

Make the right choice for you and your home

We are a family-owned and run home improvement business, proudly serving our customers since 1981.

Custom Glaze
Windows • Doors • Conservatories • Est 1981

Committed to giving you excellent quality and service!

We pride ourselves on our local work, don't use pushy sales techniques and can be trusted because we've got a hard-earned local reputation to maintain. In fact, most of our business comes from happy customers who recommend us to friends, family and neighbours.

It's not only in our showroom where you can see Custom Glaze installations. Being a local company, we have an added advantage in that you can almost always be directed to a property near your own to see for yourself how smart our products look once fitted – it's a rare street that does not have some of our work on show. Also, if you're thinking about choosing Custom Glaze and would first like to talk to one or more of our existing customers, then we would be happy to make the arrangements.

“Excellent service and craftsmanship. The installers worked really hard and exceeded my expectations.”

Mr & Mrs Coggings, Westcroft

Welcome to Custom Glaze

Custom Glaze is proud to remain a family owned and run business. Based in Milton Keynes, we have over 41 years of experience fitting windows, doors, conservatories, extensions and roofline (fascias, soffits and guttering) products in and around the area. We are highly regarded as a company who offer the very best quality at realistic prices.

Vevo

More than just windows and doors

Custom Glaze is proud to be a select installer of Vevo products. Vevo is one of England's largest manufacturers of uPVC windows and doors and we believe they're the best on the market: that's why we offer them to you.

Choosing Vevo means you can be sure your windows and doors will always be built to your specification, using the highest quality materials and years of expertise.

The result? Practical, elegant windows and doors that enhance and protect your home. Each one expertly designed and made; a thing of beauty, security and durability installed by craftspeople who care.

vevo[™]
Let the **light** in

Latest technology

Unlike most other window systems, the Vevo uPVC range is one of the most modern available and was designed from scratch to take advantage of the very latest developments in window engineering technology.

The multi-chambered design of the Vevo uPVC profile means the transfer of heat and cold is minimised, keeping your home warmer and your energy bills lower – as well as helping the environment. We also guarantee your windows are 100% lead-free.

Additional features have been designed in, to ensure the operation of your low-maintenance doors and windows is not only smooth and silent, but that they remain hard-wearing and long-lasting too.

Beautiful frames

Gone are the days when uPVC windows and doors were only available in white. Our coloured uPVC wood-grain foils are applied during the manufacturing process using the very latest in machine tooling – you may find it hard to believe that the frames aren't actually made of wood!

Or, if it's the modern look you're after, you could go for smooth grey in our sleek aluminium profile. Whether you choose uPVC or aluminium, there is a shade and finish for every home.

Safe as houses

With built-in strength, high security multipoint locks and the latest in ModLok™ technology (available on our uPVC patio and bi-fold door range) you can sleep soundly whilst knowing your home is secure and your family is protected.

Vevo windows and doors are all manufactured in the UK using the highest quality material, locking mechanisms and manufacturing processes available on the market.

Up to £1000* Insurance Excess cover on uPVC windows and doors

A leading industry insurance protection policy from Vevo

As a leading manufacturer of uPVC doors, Vevo take great pride in not only the products they research, design and manufacture, but also the services that support their installers and customers.

In the unlikely event of a successful break-in, **VevoSecure** will reimburse any insurance excess up to a maximum of £1,000*.

VevoSecure is a scheme designed to work in partnership with our customers and installers, providing you with peace of mind when it comes to protecting your property.

VevoSecure guarantees the performance of our products against break-in through failure of the locking mechanisms.

The **VevoSecure 10 year Security Guarantee** offers you complete peace of mind for free.

Better for the Environment

Energy ratings explained

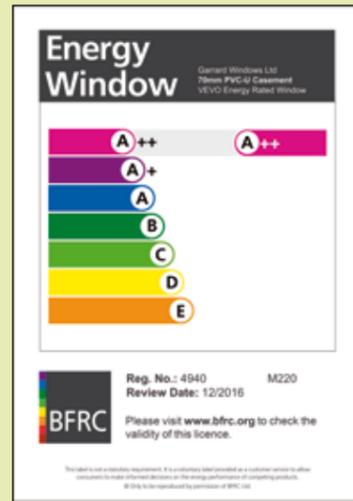

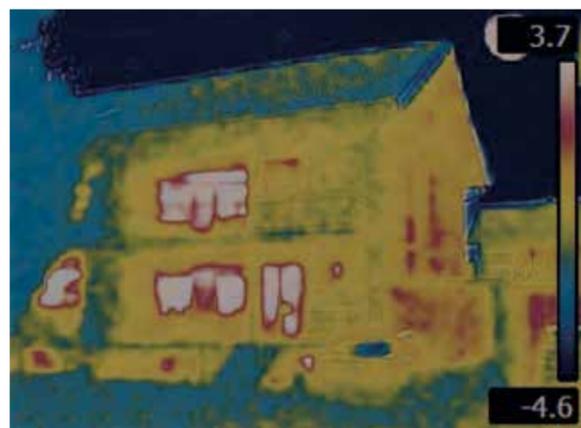

One of the most effective ways you can save energy within your home is through installing energy efficient doors and windows.

Whether double or triple glazed, our windows outperform most of the other leading windows in the UK – mainly due to our innovative uPVC multi-chambered profile design.

The BFRC Energy Rating Scheme is the UK's national system for rating the energy efficiency of windows and is recognised within the Building Regulations as a method of showing compliance for your windows installation. The rating scale indicates how well a product will:

- Help you contain and conserve heat within your home in the winter
- Keep out the elements
- Reduce condensation on the inside
- Contribute to improved sound insulation

You can lose up to 20% heat loss through inefficient windows and doors

Custom Glaze install A+ energy-rated windows as standard, better than most of our competitors, which means that you will be able to enjoy a warmer and quieter home as well as lower energy bills.

Removal & Disposal

Custom Glaze will remove all old units and building debris from site, leaving everything clean and tidy.

All waste generated by Custom Glaze goes through a Sorting Station to ensure that "waste to landfill" is kept to a minimum.

Lead-free

Custom Glaze windows are made from 100% lead-free uPVC – better for the environment, for you and your family. You no longer have lead in petrol or paint so why choose to have windows containing lead?

uPVC Profile

Why is it the best on the market?

Zero Air Leakage

Patented co-extruded bubble gaskets which outperform all others in permeability - achieving a zero air leakage result in independent tests at BSI.

Screw Retention

Hollow pockets allow for the insertion of uPVC screw retaining strips to achieve 'screw pull out forces' to rival 1.2mm steel.

Strength

The six chamber design achieves strength without the need for thermally inefficient steel inserts in both window sashes and window outer frames.

Energy Efficient

The uniquely designed six chamber energy plus system is so efficient it can achieve the energy ratings A+13 with a double glazed unit and A+23 with a triple glazed unit, which exceeds the new A++ standard.

Heat Conserving

A sign of how well insulated our windows are is that so little heat escapes, that it is not uncommon to see condensation on the OUTSIDE!

Lead Free

All Custom Glaze uPVC products are completely lead free.

Vevo Chamfered

The chamfered option creates a symmetrical, contemporary, straight edged style. Typically considered a more modern look.

Vevo Sculptured*

The sculptured option gives a more curvaceous, traditional, decorative finish to your window. A popular choice for period properties. * Supplied as standard.

Windows

Not every uPVC window system is the same

When you're deciding which range of windows to choose for your home, there are a number of factors to consider:

- Will they look good?
- Will they be sympathetic to the overall building design?
- Will they exceed the most stringent energy efficiency targets and help minimise ongoing heating bills?
- Will they provide the highest levels of safety and security?
- Are they available in a wide range of styles and colour choices?
- Is there a range of matching doors, roofs and other products available?
- Will the products be guaranteed?

The Custom Glaze range is different to other systems on the market – being designed from scratch to take advantage of the very latest developments in window engineering technology.

Combining high-tech design and engineering with the flexibility to create an individual appearance for every home, our system pushes the boundaries of possibility with a range that doesn't even need to look like uPVC. And with the patented double-action bubble gasket offering a continuous seal, even in the corners, draughty windows are a thing of the past.

Safe & Secure

Keep the intruders out!

Your home should be a safe haven – that's why our Garrard supplied windows are designed, tested and certified to meet the highest standards of security. They also cyclic test the moving parts to make sure they won't wear out, however much you use them.

Child restrictors can be fitted to almost any of our windows to give you extra peace of mind that your little ones will be safe – please ask for more information.

Enhanced security

- High security shootbolts top and bottom
- The shootbolts are double the thickness than most on the market
- An end cam fitted close to the shootbolt adds extra security
- Metal keeps for maximum security
- The centre lock has robust opposing claws that firmly grip both ends of the keep to resist attack.

PAS24:2016

This accreditation is part of the British Standards system and shows that every component used to make the product has been subjected to a series of tests, demonstrating enhanced security performance for your peace of mind.

Secured by Design

Our window supplier, Garrards holds the Secured by Design accreditation for the **Vevo Liniar 70 Window System**.*

Secured by Design (SBD) is the official police security initiative. SBD's product-based accreditation scheme – the Police Preferred Specification – provides a recognised standard for all security products that can deter and reduce crime. Products that have met the Police

Preferred Specification provides reassurance to the specifier, purchaser or user that their products have been independently tested to a relevant security standard and fully certified by an independent third-party certification body recognised by the United Kingdom Accreditation Service (UKAS).

*An optional upgrade from our standard window.

Design Options

Windows

Trusting us to transform your home and lifestyle brings exciting choices. Not least, the opportunity to choose from an almost limitless range of colours, profiles, textures and styles for the look you desire.

Georgian Bar

Our Georgian style double-glazed sealed units are manufactured with an internal bar to give the effect (at a distance) of separate sealed units.

This popular feature is always in demand as it combines stylish traditional looks, with an easy to clean, low maintenance finish.

Astragal Bar

Designed to replicate traditional timber windows, the Georgian astragal bar design goes one step further than our Georgian window.

As well as incorporating spacer bars between the glass, bars are also raised from the glass to give the window an authentic cottage style look, making the astragal bar extremely popular, particularly with owners of older-style properties.

Leaded Glass

Traditional leaded windows are an important architectural feature of many houses and very much part of the English heritage.

While a lead design serves no practical purpose today leaded windows can enhance a property of any age with character and charm. A wide choice of leaded window designs are available to closely match your existing windows. Our leaded windows offer easier cleaning and maintenance as well as the enhanced insulating qualities of modern uPVC windows.

Equal Sight Lines

A more traditional look is achieved by designing your windows with equal width frames ensuring a balanced and equal sight line across all glass units. This applies both horizontally and vertically.

Decorative Glass

You don't have to lose the character of your property when you update your windows. With a wide choice of decorative designs or even a bespoke design, your house will retain its character whilst gaining all the benefits of new windows.

Unequal Sight Lines

Having opening sashes in certain areas of the window creates an unequal glass sight line between the sash and the fixed light.

Colour Finish Options

Not just available in standard white, our windows can be personalised to suit the style of your home - as well as its colour scheme.

Special Colour Options

If the stock colours aren't quite what you want, special order colours are available.

The molecular cross bond process of Kolorbond means that the choice of colour for your windows is truly yours. Available in all standard RAL and BS colours. Colour can be applied to uPVC window frames, doors, conservatories and fascias. Guaranteed to adhere to the plastic and is extremely colour stable and resistant to UV. We also offer a special order foiling option. Ask our sales team for details.

The colours shown in this brochure give an indication only. No guarantee can be given that they will exactly match the product

Handle Options

Your choice of handles complements your good taste in windows.

Our range of handles combines security, practicality and aesthetics for a long, trouble-free service life - with colours and finishes to match or contrast with our uPVC products. Available in both straight and cranked styles.

Window Styles

Casement Windows

The casement window offers total versatility and is still the most popular choice available today.

This style offers slim sight lines to allow in maximum light and is available in sculptured (curved) or chamfered (bevelled) 70mm profiles (frames). Our windows are internally beaded as standard.

To add character, you can add astragal bars or Georgian bars, you can also choose from a wide range of colours, finishes and hardware and glazing options.

“This is the second time we have used Custom Glaze, the first time for a patio door. We are just as pleased with the result and workmanship this time.”

Mr & Mrs West, Newport Pagnell

Tilt and Turn Windows

You can enjoy having your windows open without the worry of security with tilt and turn windows. This style offers a greater scope for larger opening lights than a traditional casement window and the larger panes of glass help its thermal performance.

Perfect as a fire escape or simply to let in more fresh air, most windows are supplied as ‘tilt before turn’ to make them safer and avoid the risk of children opening them fully in the first instance.

They are available with as many options as our popular casement windows.

Shaped Windows

A window does not have to be square, in fact we have the ability to ‘fit any window, anywhere’.

We can provide windows in all shapes and sizes and as with the standard range of double glazed windows, they can be made from an almost limitless range of colour finishes, profiles, textures and styles for the look you want.

Sliding Sash Windows

This style of window combines the best of both worlds - the traditional visual appeal and versatility of sliding sash windows with modern low-maintenance and rattle-free construction.

Vertical sliders can be styled with various Georgian bar designs: single, double bars or a full grid and with a choice of internal or astragal Georgian bar.

Finishing touches can include sash horns, thumb latches and finger pulls.

Window Styles

Flush Casement Windows

For the look of a traditional timber window with the advantages of uPVC.

Many property owners require a traditional timber window frame, sometimes due to planning or environmental restrictions, making this an ideal choice.

The flush casement window is an ideal choice over the more expensive timber option. The sash is fitted flush into the frame and it can be foiled to look like traditional timber or to offer a sleek contemporary finish.

As with the rest of the range, the flush sash window offers a lower cost option with higher thermal benefits than a timber window – in addition to being fully secure.

Available in sculptured profile with a flush finish on the external face and in a wide choice of colours.

Bay and Bow Windows

Bay or bow windows are a great way to bring more light into your home. The ultra-slim frames of these windows increase the flow of natural light as well as creating an enhanced field of view.

Choose from different styles and colours and enhance the look with a range of additional designs including leaded glass, Georgian or astragal bar or decorative horns.

Decorative glass fanlights can be ordered to closely match your existing designs and the roof can be GRP or lead.

“Everyone involved in dealing with this contract have been very professional and to a very high standard.”

Mr & Mrs Dennis, Loughton

Horned Sash Windows

Horned Sash windows preserve the classic look of wooden-box-sash windows thus maintaining the authenticity of any property. Made to complement our casement range this window looks like a traditional sliding sash but performs as a casement – giving you the best of both worlds!

They are designed to achieve the highest levels of weather-tightness and resistance to draughts and the high security shoot bolt locking systems provide unparalleled protection against break-ins.

For an individual appearance, you can customise them with accessories such as Georgian bars.

Bi-Fold Windows

A popular choice for conservatories and orangeries as well as commercial use, the bi-fold window enables you to fully open one side of the room whilst retaining valuable wall space for furniture inside the room.

Not only does the bi-fold window have high energy efficiency, it meets the highest security standards and is manufactured in the UK. With a huge choice of colours and pane options, this style of window can look either modern and contemporary or traditional, enhancing any type of building.

Composite Doors

Composite Doors

A composite front door combines the traditional appearance of a timber door with the thermal performance and optimum style of a modern solution – offering up to six times the insulation of a timber door.

Whether your home is on a busy main road, or a rural retreat, a composite door guarantees security, together with maintenance-free enduring performance.

Please request a brochure to see many more styles

Composite Doors

uPVC Doors

uPVC Doors

uPVC doors offer a classic look which combines the best features of traditional doors with the practical benefits of modern design and materials.

Perfect for back doors as well as front doors, each door is made to measure, tailored to your specification and the style of your home. They can be fully glazed, clear, patterned or sandblasted and offer a choice of furniture to suit your taste.

French Doors

French Doors

Offering a more traditional alternative to patio or bi-fold doors, our stunning range of uPVC French doors come with the same high specification and colour options as our window range - just as you'd expect.

Our French doors are available in either 'open in' or 'open out' style to suit your living space and provide your home with a beautiful and secure entrance - complete with a range of patented low and ultra low threshold options which is ideal for providing access for those with limited mobility.

Safe and Secure

Your home should be a safe haven – that's why all our products are designed, tested and certified to meet the highest standards of security. All the moving parts are also cyclic tested to make sure they won't wear out, however much you use them.

Personalise Your Door

There are a huge number of options to choose from to truly personalise your French doors – the style of frame, colour, glazing and handles – the possible combinations are limitless!

uPVC Bi-Fold Doors

uPVC Bi-Fold Doors

Imagine being able to open up an entire wall of your room, bringing the outdoors indoors and bringing a whole new dimension to entertaining at home.

Our bi-fold door is the only uPVC range with a completely smooth opening and closing action, slimline frames, bespoke hinges and locks, together with a choice of styles, colours, pane combinations and handles – and our registered design low threshold opening for family-friendly or wheelchair access.

The bi-folding door range comes in a huge range of opening configurations so you can be sure of getting the right one for your home – from a 2-pane to a 7-pane door. Talk to us today about the most suitable combination for your needs.

Now with patented ModLok™ locking mechanism for extra security and strength, we believe it is the very best on the market. Add to that being one of the most thermally-efficient, helping to keep energy bills lower, and you can see why our bi-fold is a more cost-effective choice than a timber or aluminium door.

Patio Doors

Patio Doors

Our patio door is one of the most modern and up-to-date sliding patio door systems available on the market.

Designed and manufactured in the UK, it offers a family-friendly low threshold option - perfect for ease of access, as well as a unique 'air glide' system that provides stability, durability and a smooth, silent operation. The self-cleaning track with built-in brushes, sweep the track clean every time the door is opened and with its ultra-slim sculptured sightlines, this patio door is one of the most attractive on the market.

High level of security

Security is very important so our patio doors feature the patented ModLok™ system, a combined reinforcement and multi-point locking system developed in conjunction with Yale. In addition, all external sliders feature anti-lift properties to combat would-be intruders

Choice of style and colours

You can choose from 2, 3 or 4-pane styles, and the coloured foils give the appearance of woodgrain which won't peel or scratch off.

Aluminium Doors

Aluminium Doors

Alitherm Plus

The Alitherm Plus range of residential aluminium doors gives a high performing, robust domestic door at an affordable cost. It features adjustable hinges and lock keeps ensuring your door is completely adjustable and secure for any application.

Visoglide Plus

This patio door adds eye-catching impact to the exterior of your home. The outward appearance focuses on a stunning glass area, highlighted by bold aluminium sections' styles with clean aesthetic lines that work in harmony with the character of any home.

Slide 200

This versatile, single track, residential sliding door system provides a highly attractive, slim-line sliding door that has all the advantages of modern thermal break profiles to keep the heat in.

It offers the option of 2 or 4 pane doors to suit any application. The 2-pane mono track options provide a single opening sash on either the left hand or right hand side. The 4-pane option allows for two operating sashes in the centre and fixed panels on the outside.

Slide 200

Aluminium Windows

Aluminium Windows

Alitherm 300 /800

An aluminium casement window perfect for residential installations.

Heritage 47

This style offers practical and elegant windows for when you need to keep the style of your building's original windows and you cannot detract from the aesthetic character of your property.

Aluminium Sliding Sash

The slim frame sightlines and slim '42mm' meeting rails make this modern window perfect for both commercial or domestic properties. The flush opening of the sashes with no projections makes it ideal for schools and hospitals and if you're trying to replicate a traditional sash window, it comes with a choice of decorative sash horns and deep bottom rails.

All our aluminium sliding sash windows come with traditional authentic looking catches in a range of colours: White, Black, Gold, Chrome and Brushed Steel.

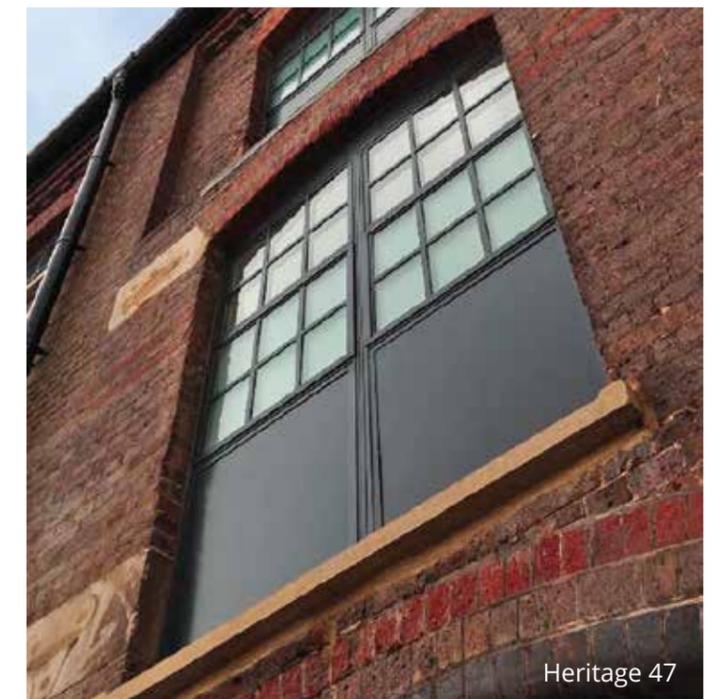

Alitherm 300 / 800

Alitherm 300 /800

Heritage 47

Aluminium Bi-Fold Doors

Aluminium Bi-Fold Doors

With Custom Glaze products there are always options. The option of aluminium which provides additional strength and durability.

Thermally efficient they contribute to a reduction in heat loss and the cost of heating bills, providing warmth and comfort. The rigidity of aluminium sections means that these bi-folds show more glass and less frame than the uPVC option.

Colour Options

The standard finish for an aluminium bi-fold is white (powder coated) and guaranteed for up to 25 years, (although this can be scratched if mishandled). Alternatively, a RAL colour is possible. You could choose one colour inside and another outside. To make a real feature of your bi-fold there is also a wide choice of metallic finishes and for the final touch, colour coded handles, hinges and roller carriers are available.

At Custom Glaze we offer a choice of two aluminium bi-folding door systems.

The VevoFold 1000 system is available in a choice of internally or externally folding panels, which when open help to bring the outside, inside by offering uninterrupted views.

The VevoFold 1000 is available in sash widths up to 1200mm.

The VisoFold 6000 system is the latest addition to the range. It features the slimest profiles currently available in our folding sliding range. The system provides a contemporary, elegant solution, using slim profile to maximise views even when the doors are closed.

The VevoFold 6000 is available with sash widths up to 1000mm.

Conservatories / Extensions

Edwardian Classic Roof

Lean-To UltraRoof

“We were highly pleased with the quality of the product and very pleased indeed with the professional workmanship and friendly manner of the fitters.”

Ms Coll, Wolverton

Gable Front Ultra Roof

Conservatories and extensions have come a long way over the years. Along with a wide range of styles, they also offer a choice of roofing systems so are an ideal alternative to a traditionally built home extension.

So whether it's to extend an existing room or to create a whole new living space, a conservatory is an ideal solution.

Free Design Service

Choosing the right conservatory is a big decision. Your choice must complement your home and be right for its intended use.

We are here to help you make the right choice by offering a start to finish process - our expert team will design your conservatory working with you to achieve the room that you want, including support for any planning application and building regulations as required.

Wide-fronted Victorian

The Wide-fronted Victorian conservatory/extension suits all styles of house and home - from a period property to a new build.

Choose from the three-facet Victorian, featuring a bay front with three main windows at wide angles, or the five-facet Victorian. This style also has a bay front but with five main windows for space as well as aesthetics.

Edwardian

The Edwardian conservatory style is characterised by its lightness and airiness.

This style features a flat front and a square or rectangular symmetrical shape. It typically has a high, sloping roof style that gives a spectacular vaulted effect flooding the conservatory with light, making it a bright, airy and uplifting room.

Gable Front

A gable-front conservatory can add real grandeur to your home.

Square or rectangular in style, a gable end style gives you maximum space to plan the interior of your conservatory. The gable roof provides a grand and stunning impact both inside and out, and also maximises light coming into the room.

Lean-To Classic Roof

Wide-Fronted Victorian LivingRoof

Lean-To

Perfect for properties that have restricted space under the eaves.

This is the simplest of conservatories in terms of design and with its clean lines, it helps it maintain a contemporary look. As the pitch of the roof can vary, it is ideal for a bungalow that requires a shallow pitch or a terraced house where a steeper pitch would be ideal.

P-Shape

Combining a mix of lean-to and Victorian styles, the P-Shape conservatory is the ideal choice for a larger conservatory.

This style combines a lean-to conservatory with a Victorian conservatory, which can be either three-faceted or five-faceted. Alternatively you can combine a lean-to with an Edwardian style conservatory to create what is called an L-shaped design.

Conservatories / Extensions

Choice of Roofing Systems

Once you've decided on the style of your conservatory, you then have a choice of roofing system. We have a system to suit every home and every budget, with a choice of traditional or contemporary looks.

Classic Roof

The Ultraframe Classic glazed roof is in our opinion the best on the market. The roof is designed and engineered to your postcode to ensure they can withstand extreme wind and snow. We supply all our roofs with a certificate of authenticity to prove that all the components supplied to your roof are genuine Ultraframe products.

The LivinRoof

The LivinRoof roofing system is designed to give you the flexibility to combine solid and glazed roofing seamlessly.

Whether you are constructing a new home extension or replacing an old existing conservatory roof the LivinRoof can give you total design flexibility and the ability to create stylish and thermally efficient rooms like no other solution on the market.

The LivinRoof system is constructed from insulated composite external panels and Kingspan slab insulation, which are strong and robust yet extremely thermally efficient.

One of the fantastic features of the LivinRoof is that it allows you to incorporate glazed panels anywhere you like and in any shape, this not only lets daylight penetrate deep into your room but allows you to produce a completely bespoke design.

All livinRoof designs come as standard with an internal pelmet, not only providing the perfect place for spotlights and speakers, but it gives the effect of lifting the vaulted ceiling, giving a light and airy feel to the new room.

Externally the livinRoof is finished in urban grey panels to complement any housing style, producing a contemporary look.

Visit www.customglaze.co.uk for an online estimate

UltraRoof

Just like the LivinRoof the UltraRoof gives you the ability to have glazed and solid roof sections. The difference with the UltraRoof is that instead of using panels it utilises a lightweight tile (available in 3 colours) allowing you to achieve a solid roof but still retain light. The UltraRoof also incorporates an internal pelmet as standard.

The UltraRoof and LivinRoof are extremely thermally efficient and are fully compliant with Building Regulations; you can even choose to remove the barrier between the new room and your existing house, dramatically opening up your home. In contrast to a classic conservatory your new room will form part of the footprint of your home and as such increase its value.

Lantern Roof

UltraSky Lantern sits on a RubberBond fully insulated flat roof. It has an elegant 25° pitch to all four sides providing a stunning addition to any room, letting light flood through. The UltraSky Lantern is ideal for creating a focal point to a kitchen or dining room extension. The thermally broken aluminium structure increases thermal performance. A choice of Aluminium and uPVC finishes are available to compliment your windows and doors.

Extras:

Internal Pelmet

A perimeter ceiling, providing the ideal place for down lighting.

Cornice

The Cornice (available in a number of styles) hides the guttering giving the roof a modern aesthetically pleasing feature. The UltraRoof only accepts the standard cornice.

Loggia Columns

Super insulated columns which are an alternative to traditional brickwork. They are five times more thermally efficient than brickwork, and are colour coded to your window and door frames.

Visit www.customglaze.co.uk for an online estimate

Fascias, Soffits & Guttering

uPVC Fascias, Soffits and Guttering

Roofline products are essential components for any property. Exposed to the elements, they play a crucial role in protecting the roof space and rafters of your home.

We offer everything you need for a complete, high-performance roofline system, manufactured to the highest quality standards.

Low Maintenance

Our uPVC roofline products will not rot, crack or warp and require no sanding, painting or treatment – ever. To keep them looking at their best, all that is needed is an occasional wipe clean with a damp cloth.

Fascia Boards

Available in a range of colours and either a standard flat profile or a distinctive 'ogee' style.

Soffit Boards

We offer a complete range of soffit boards which perfectly complement our fascia boards. These high-quality components give your roofline an attractive, clean-edged finish and require minimal maintenance.

Guttering

Our range of uPVC guttering is manufactured from high-impact, high-gloss uPVC for a durable, weatherproof finish. It not only ensures efficient drainage of your roof, but can also improve the appearance of your home.

Coastline Cladding

Composite Cladding

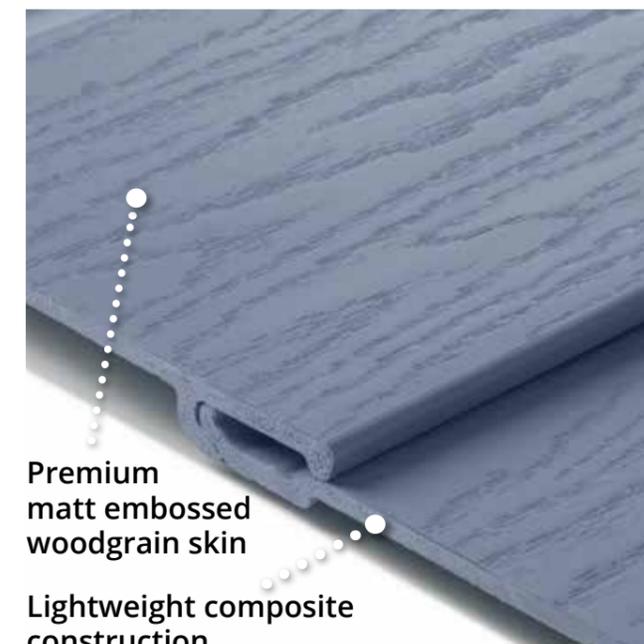

At Custom Glaze, we're always looking at new ways to bring you even better products. And here's the latest from Eurocell.

It's called Coastline. An innovative composite cladding system that lifts the appearance of any property and adds up to 10 years of guaranteed weatherproof performance to every exterior.

It's made from a unique new composite material that means it's incredibly resilient, yet amazingly easy to work with and fit.

What's really revolutionary though is that Coastline has minimal contraction or expansion, whatever the weather conditions.

That's great for householders, who can look forward to living in a home that's protected from the elements trouble-free for the next 10 years. Installation is very straight-forward; Coastline is lightweight, easier to lift and handle than cement boards and needs no other trades on site to get the job done.

Custom Glaze projects

Customer check list

A checklist to help you choose the right company for your windows, doors or conservatory.

✓ **Does the company have a proven track record?**
We have over 38 years of experience and have always traded as Custom Glaze.

✓ **Will the installation comply with Building Control?**
We use our own installers and they all comply with the rigorous standards set out by Building Control using FENSA – the Government authorised Competent Persons Scheme for the replacement of windows, doors and roof lights in England and Wales.

✓ **Does the company supply A+-rated energy windows as standard?**
Custom Glaze fit A+-rated energy windows as standard to ensure that your home is well insulated and energy efficient.

✓ **Can I be sure of a reliable after-sales service?**
We have a dedicated after-sales team so should the need arise, you can be reassured that we will look after you beyond the installation period.

✓ **How can I be certain of the installation quality?**
Every one of our fitters is qualified to Level 2, NVQ Diploma in Fenestration Installation (Construction) (QCF) standard, as well as being FENSA MTC compliant (Minimum Technical Competencies) so you can be totally confident of a quality installation.

✓ **Is my deposit protected and is it a meaningful guarantee?**
Deposits, other payments and your after-sales warranty are fully backed by HomePro insurance.

✓ **Can I rely on Government TrustMark Accreditation?**
Custom Glaze operate within the stringent framework of the Government's TrustMark Scheme which recognises traders who are reputable and trustworthy.

"TrustMark has been successfully providing consumers with an impartial assessment of the standards of local tradespeople, to help them make informed decisions when hiring contractors to improve their homes".

Vince Cable, former Secretary of State for Business

Customer Testimonials

Showroom

"Fast friendly craftsmen installed everything on time. Finish looks good."

Mr & Mrs Berry, Giffard Park

"Arrived on time. Very friendly and courteous. Carried out the installation efficiently. Explained how everything worked, and tidied up well before leaving."

Mr Derek Curran

"Have used Custom Glaze for my windows, doors and conservatory on several different occasions over the last 25 years, value for money and workmanship, staff and fitters always friendly and helpful."

Mrs Jacqueline Hooper

"Very impressed with all aspects, The 2 installers Tom and Dave were very professional, pleasant and friendly. Did an excellent job. Would highly recommend the company."

Mr John Parry
